

SUMMARY

I am an experienced developer who has been working in software development **since 2019**, specializing in building user interfaces, testing, and debugging. Skilled in Vue.js, Node.js, React.js, AngularJS, PHP, JavaScript, Java, and SQL, I am passionate about programming and continuously learning new technologies to solve complex challenges.

EXPERIENCE

Linkse Pte ltd | Singapore

Frontend Engineer

(October 2025 - now)

- Own frontend development of the Quality Inspection Suite, a SaaS platform serving manufacturing clients across multiple countries.
- Architect and ship micro-frontend modules using Vue.js and Quasar Framework, enabling independent deployment across product teams.
- Collaborate with a distributed multinational team, delivering features on a continuous release cycle.

Pratesis - Geek Garden | Indonesia

Frontend Engineer

(February 2026 - April 2026)

- Delivered frontend modules for ScyllaX, a nationwide enterprise distribution management system used by major principals and distributors.
- Developed role-based dashboards for real-time sales, inventory, and KPI tracking using Vue.js and Quasar Framework.
- Established unit testing practices across the frontend codebase, improving release confidence and reducing regression bugs.

Indodax Nasional Indonesia | Jakarta , Indonesia

Frontend Software Engineer

(October 2023 - June 2025)

- Shipped features for INDODAX, Indonesia's first and largest licensed crypto exchange.
- Led the migration of legacy CodeIgniter 2 pages to Vue 3 (Nuxt), cutting page load times and eliminating technical debt.
- Partnered with UI/UX and backend teams to deliver pixel-perfect, responsive interfaces across exchange, academy, and marketplace products.

BPJS ketenagakerjaan - Indocyber Global teknologi | Jakarta, Indonesia

Full Stack Developer

(October 2022 - October 2023)

- Built internal procurement systems for BPJS Ketenagakerjaan, Indonesia's national social security agency for employment.
- Developed full-stack features using Express.js, Vue.js, React, and PHP CodeIgniter.
- Identified and resolved security vulnerabilities from penetration testing, ensuring compliance with government standards.

Citra Cantik Nusantara (BeautyBell) | Jakarta , Indonesia

Frontend Developer

(December 2021 - October 2022)

- Developed admin dashboards and customer-facing web apps for BeautyBell, a beauty services marketplace.
- Built responsive interfaces with Vue.js (Nuxt) and AngularJS, translating Figma designs to production-ready code.
- Integrated booking, payment, and service management APIs powering the end-to-end customer experience

Edconnect Solusi Integrasi | Jakarta , Indonesia

Software Engineer - Full Stack

(September 2019 - November 2021)

- Developed and maintained edConnect, a cloud-based school management SaaS serving multiple educational institutions.
- Led the migration from Angular to Vue 2, reducing development complexity and improving team velocity.
- Designed MySQL schemas and built backend features in Java, handling deployment and server configuration.

PROJECTS

Maiuno | maiuno.app | Android , Web

- Built a mobile POS app for small businesses in Indonesia using React Native, Golang, and PostgreSQL.
- Developed the product landing page and portfolio website using Next.js, TypeScript, and TailwindCSS.
- Implemented fast checkout, inventory management across locations, real-time sales analytics, and Bluetooth receipt printing.
- Designed dedicated layouts for both phone and tablet with staff management, multi-store support, and booking features.

Upvendo Kiosk & Admin Dashboard | upvendo.com | Web , Kiosk

- Developed an online selling platform for kiosk machines with an admin dashboard for managing products and transactions.
- Built the frontend using Nuxt (Vue) and Vuetify as a freelance project on Upwork.
- Implemented customer-facing kiosk interface and back-office operations dashboard.

PT Karya Tekstil Nasional | karyatekstilnasional.com | Web

- Developed a company profile website for a Jakarta-based garment manufacturer using React, Vite, TailwindCSS, and Framer Motion.
- Built a product portfolio gallery with lightbox, video hero background, and multi-language support (Indonesian/English).
- Implemented SEO optimization, WhatsApp integration, and responsive design for mobile and desktop.

Freelance Web Development | rickygeorgius.com/project | Web

- Delivered multiple promotional and landing page websites for various clients across different industries.
- Built projects using Next.js, Nuxt, and TailwindCSS with responsive design and performance optimization.
- Managed full project lifecycle from client requirements to deployment on Vercel and static hosting.

EDUCATION

Bunda Mulia University | Jakarta , Indonesia

Computer Science | **GPA** : 3.62/4.00

(2016-2020)
